MEDICINE IS BRILLIANT

Rationale: 'The NHS is under pressure as never before, trainees and consultants are dispirited, and the future seems austere. What are the system levers and tools available to clinicians on the ground to turn this situation around?'

Professor Goddard will explore the background, the evidence for how the professions and individual clinicians can make a difference and why he believes 'Medicine is Brilliant'.'

Tuesday 28th May 2019

Hosted: Lecture Theatre, Conquest Education Centre with video conferencing to Lecture Theatre, EDGH Postgraduate Centre

For further details please contact Dr Umesh Dashora, Regional Adviser, RCPL

We take great pleasure in welcoming
Professor Andrew Goddard

Professor Andrew Goddard Biography.

Professor Goddard qualified at Cambridge in 1990. After gaining an MD from Cambridge University he trained in Nottingham and was appointed as a consultant physician and gastroenterologist in Derby in 2001. His main clinical and research interests are bowel cancer screening, *H. pylori*, iron deficiency anaemia and inflammatory bowel disease.

He was director of the Royal College of Physicians (RCP) Medical Workforce Unit for five years until being appointed RCP Registrar in 2014. In this role, he oversaw professional and clinical affairs, both in the UK and internationally. His main policy areas were workforce, healthcare funding, the future of general medicine, the medical registrar and 'keeping medicine brilliant'. In 2018 he was elected the 121st RCP President, the youngest for 400 years and first from the East Midlands.

His priorities as President are the three Ws – workforce, wellbeing and worldwide. He continues in clinical practice including being on-call at weekends, as well as continuing in clinical research. He strongly believes that *medicine is brilliant*
