

# GUIDANCE FOR IMT TRAINEES REGARDING CLINICS AT CONQUEST

**Date of preparation:** 1 April 2024

**Authors:** Dr Steven Fong (College Tutor)  
Dr Vivienne Maccallum (IMT Trainee Rep)  
Dr Umesh Dashora (Deputy Chief of Medicine)

## Overview

This document outlines current clinic opportunities available to IMT trainees at Conquest Hospital, as well as the arrangements in place to attend clinics and roles and responsibilities expected from IMT trainees in regards to attending clinic. As per the IMT curriculum, trainees are expected to complete a minimum of 20 outpatient clinics per year.

The main points for IMT Trainees to be aware of:

- 1) There are a variety of rostered and adhoc clinic opportunities available to IMTs at Conquest Hospital in multiple specialties including Geriatrics/Cardiology/Respiratory/Acute Medicine/Gastroenterology/Endocrine.
- 2) The table below outlines the various days in which the clinics take place.
- 3) Trainees are encouraged to attend as many clinic opportunities as possible, with the expectation that adequate arrangements are made to ensure safe staffing on the wards, which will be supported by the Medical Admin Staff, Service Managers and Consultants.
- 4) All the consultants listed below have confirmed that they are happy to supervise IMT doctors in clinic.
- 5) Trainees are expected to confirm in advance with the consultant supervising a clinic that they are attending.
- 6) Trainee can check the clinic availability on Esearcher via the **Clinic List** option.
- 7) It is the responsibility of the trainee to check with secretaries and administrative staff regarding the location of clinics and to inform them if they cannot attend (particularly for regular rostered clinics).
- 8) Trainees should inform Medical Admin in advance when they are attending clinic so that adequate ward staffing can be monitored.
- 9) The trainees should check in advance with the relevant outpatient department matron that a room has been allocated in advance for them, and if there is an issue, they should liaise with relevant service manager and educational supervisor.
- 10) Trainees can swap clinics if required on an ad-hoc basis particularly if a trainee cannot attend but another trainee can do so – but it is important to notify your teams and medical admin in advance so they are aware of availability on the ward
- 11) Trainees can liaise with each other to coordinate clinic attendance and escalate to their trainee representatives and College Tutor if there are issues.
