

Nuclear Medicine 3 Phase Bone Scan

Your doctor would like you to have a Nuclear Medicine scan and has arranged for you to visit our department. We would like your visit to be as pleasant as possible and hope this leaflet will answer some of the questions you may have. Should you have any questions regarding your appointment please contact us on one of the telephone numbers below between 9:00am and 5.00pm Monday- Friday.

0300 131 4797 or 0300 131 5853

WHAT IS A BONE SCAN?

A bone scan is a way of taking pictures of your bone metabolism. Images are taken using a Gamma Camera. A small amount of radioactivity is used to produce these pictures. The pictures will help your doctor understand your illness.

IS THE SCAN SAFE?

The amount of radiation you receive is as small as possible and is similar to other X-ray procedures. The radioactivity leaves the body very quickly and it will not make you feel sick or sleepy.

DO I NEED TO PREPARE FOR THE SCAN?

You do not need to do anything special. You can eat and drink normally and keep taking your tablets. You should wear loose fitting comfortable clothing.

IS THERE ANYTHING I SHOULD TELL THE STAFF BEFORE THE SCAN?

Women should tell us if they are pregnant, if they think they may be pregnant or if they are breast-feeding. Women between the ages of 12 and 60 will be asked to sign a form on the day of their test to confirm they are not pregnant. If there is any doubt, then by law we have to perform a pregnancy test before we can do your test.

WHAT IS INVOLVED?

Shortly after you arrive you will be given a small injection in a vein in your arm or hand. The injection is a radioactive tracer that is absorbed onto your bones. We do not expect you to have any side effects to the injection. You will have a 5 minute scan immediately following the injection. A second scan will take place 3-4 hours later and will take up to 1 hour.

You will be asked to empty your bladder just before your scans and to remove any clothing containing metal and to empty your pockets. The scan involves taking pictures while you lie on a bed. The camera is placed close to the part of your body being studied. During your second scan additional images are taken where the camera moves from your head to your toes then rotating slowly around your body. A CT scan may also be performed to help further assess your condition. It is important you keep very still during your scan.

PRECAUTIONS AFTER THE INJECTION

After your injection you should avoid prolonged close contact with pregnant women and children for 24 hours. Children and pregnant women should not accompany you to the department. You should also avoid blood tests and dental visits during this time. If you are planning to travel abroad within 7 days after your appointment, please inform the staff during your appointment.

WHAT CAN I DO BETWEEN THE FIRST AND THE SECOND SCAN?

You can leave the hospital or stay with us. Meals and snacks may be bought in the hospital. If possible, you should drink plenty of fluids and empty your bladder frequently.

WHAT CAN I DO AFTER THE SCAN IS COMPLETE?

You can go home or to work. You can drive a car and eat and drink normally.

WHAT HAPPENS TO THE RESULTS?

We cannot give you the results of your test. We will send a report to the doctor who asked for the scan as soon as possible.

CONSENT

Although you consent for this treatment, you may at any time after that withdraw such consent. Please discuss this with your medical team.

NUCLEAR MEDICINE BONE QUESTIONNAIRE

To help with the interpretation of your scan could you please answer some questions regarding your medical history?

Please bring this questionnaire with you when you attend for you scan.

HOSPITAL NUMBER: X

NAME:

1) Are you experiencing any specific aches and pains?

YES NO

If **YES**, please indicate on the image below.

Have you had a fracture (broken a bone) in the past 2 years?

YES NO

If **YES**, which one?

Have you had a fall recently that didn't necessarily require a doctor?

YES NO

If **YES**, which part did you injure?

Have you had any previous bone or joint surgery?

YES NO

If **YES**, give details including date(s) of surgery

Have you had, or are currently receiving radiotherapy?

YES NO

If **YES**, to which part of the body and when?

Have you had, or are you currently receiving chemotherapy or hormone therapy?

YES NO

If **YES**, when was your last treatment?

Are you on any treatment for osteoporosis?

YES NO

Have you had any recent dental treatment?

YES NO
