

# My visit to Bexhill Hospital Outpatients

## A visual story

The Child Development Clinic is at Bexhill Hospital. When you get to the hospital go in the main entrance.

This is the main foyer of the hospital, it might be a bit crowded but you don't need to stop here, just carry on past reception, round to your right and through the doors at the end in front of you. Bexhill Hospital can look a bit serious, but they're all a really friendly bunch 😊

When you see 'Area A, B, or C – you have arrived! You can sit in the waiting room and play with the toys.

One of the nurses will ask if they can weigh and measure you, this doesn't take long, the scales are in another room just off the waiting room area.

Then you can go back to playing in the waiting area.

This is one of the Doctor's rooms, your parents will go in there to see the Doctor but you can play in the waiting room for a while with someone who came with you or maybe a nurse, when they need you to speak to the Doctor they will come and get you.

Once you and your parents have spoken to the Doctor it will be time to go home.
