What is Patient initiated follow-up?

Patient initiated follow-up puts you, the patient, in control of when you are seen by the Cardiology team, if you experience a deterioration in your condition.

Attending regular outpatient appointments scheduled by the hospital can cause unnecessary anxiety – e.g. time taken to travel, park and wait for the appointment – if your condition is stable. Sometimes, regular outpatient appointments may not result in any change to your treatment. In fact, your condition may exacerbate in between regular booked appointments and it's during this time that you really need our input.

Patient initiated follow-up will put you in control of making an appointment when you need it the most.

For all other concerns, or if you are feeling unwell, your GP will remain your first point of contact.

How does it work?

You will be advised by the team if your condition is now suitable to have patient initiated follow-ups instead of the regular appointments scheduled by the hospital.

Your clinician will have advised you about the process and given you this patient information sheet for you to consider if you want to have your follow-ups in this way; it is your decision.

How will I book a patient initiated appointment?

To book an appointment to see the team, please call the appointments number on the front of this leaflet and a member of our team will arrange an appointment for you.

When should I call for a patient initiated follow-up?

You should call if you feel you are experiencing an exacerbation of your condition.

The PIFU will run for 6 months.

When should I not to use patient initiated follow-up?

Patient initiated follow-up should not be requested for regular follow-ups.

If you require urgent medical advice you should contact your GP, NHS 111, your local Walk-in centre or, if you are really unwell, your local Emergency Department (A&E).

How do I arrange an appointment?

If you have a exacerbation of your symptoms, just follow the steps below and the team will help you:

- 1** Call the appointment team on the number provided on the front page of this leaflet
- 2** Explain that you are on a patient initiated follow-up pathway
- 3** Agree an appointment date and time
- 4** Attend your clinic appointment.

In the event you need to leave a message when you call, please leave the following information:

- Your full name and date of birth
- Your hospital number and/or NHS number
- A telephone number where we can call you between 8.30am and 5pm
- Date of your last Cardiology appointment.
