FREEDOM OF INFORMATION ACT

I am responding to your request for information under the Freedom of Information Act. The answers to your specific questions are as follows:

Please list the supplier and system name of all data management systems in use for point of care testing devices within your hospital/trust.

Clarification was sought asking you to be more specific as your request is much too broad and has questionable meaning and confirmation was received as follows:

A Point of Care (POC) testing device is used throughout the hospital to provide near patient testing at the patient point of care instead of testing in the Laboratory. These devices are typically managed by the Laboratory, Point of Care team or Medical Physics. A POC Data Management System (DMS) is used to manage these devices and gather their patient test data so it can be sent to other Hospital Systems. We would like to know the supplier and system name of any POC DMS systems used by the Trust.

Some typical POC-IT Data Management Systems in use are:

Supplier	System
Abbott	AegisPOC
Abbott	UniPOC
Clinisys	Poct Solutions
Conworx	POCcelerator
Nova	BioConnect
Nova	NovaNet
Radiometer	AQURE
Roche	Cobas IT1000
Roche	Cobas Infinity
Siemens	POCcelerator
Siemens	RapidCOMM
Siemens	UniPOC
Werfen	GemWeb
Werfen	GemWebPlus

East Sussex Healthcare NHS Trust's data management systems, currently in use for POCT, are Siemens - UniPOC and Werfen - GemWebPlus.

Cont.../

If I can be of any further assistance, please do not hesitate to contact me.

Should you be dissatisfied with the Trust's response to your request, please write to the Freedom of Information Department (esh-tr.foi@nhs.net), quoting the above reference.

Yours sincerely

Linda Thornhill (Mrs)
Corporate Governance Manager
