

## Nuclear Medicine Gastrointestinal Bleed Scan

Your doctor would like you to have a Nuclear Medicine scan and has arranged for you to visit our department. We would like your visit to be as pleasant as possible and hope this leaflet will answer some of the questions you may have. Should you have any questions regarding your appointment please contact us on one of the telephone numbers below between 9:00am and 5.00pm Monday- Friday.

0300 131 4797 or 0300 131 5853

### WHAT IS A GASTROINTESTINAL BLEED SCAN?

A Gastrointestinal Bleed scan is a way of taking pictures to identify and localise internal bleeding within the small and large intestine. Images are taken using a Gamma Camera. A small amount of radioactivity is used to produce these pictures.

### IS THE SCAN SAFE?

The amount of radiation you receive is as small as possible and is similar to other X-ray procedures. The radioactivity leaves the body very quickly and it will not make you feel sick or sleepy.

### DO I NEED TO PREPARE FOR THE SCAN?

You do not need to do anything special. You can eat and drink normally and keep taking your tablets. You should wear loose fitting comfortable clothing.

### IS THERE ANYTHING I SHOULD TELL THE STAFF BEFORE THE SCAN?

Women should tell us if they are pregnant, if they think they may be pregnant or if they are breast-feeding. Women between the ages of 12 and 60 will be asked to sign a form on the day of their test to confirm they are not pregnant. If there is any doubt, then by law we have to perform a pregnancy test before we can do the test.

### WHAT IS INVOLVED?

Shortly after you arrive you will be given an injection into a vein in your arm or hand. This injection targets your red blood cells. After 20 minutes you will be asked to empty your bladder and to remove any clothing containing metal and to empty your pockets. You will then be given a second small injection in a vein in your arm or hand. The second injection allows us to visualise your blood circulation using the scanner. The scan will begin immediately after the second injection and will take up to 2 hours. The scan involves taking pictures while you lie on a bed. The camera is placed close to your abdomen and is not over your face. Additional images may include the camera rotating slowly around your body plus a CT scan may also be performed to help further assess your condition. It is important you keep very still during your scan. Occasionally it may be necessary to take additional images should the doctor require more information. These additional images will be discussed with you after your initial scan.

### PRECAUTIONS AFTER THE INJECTION

After your injection you should avoid prolonged close contact with pregnant women and children for 24 hours. Children and pregnant women should not accompany you to the department. You should also avoid blood tests and dental visits during this time. If you are planning to travel abroad within 7 days after your appointment, please inform the staff during your appointment.

### WHAT CAN I DO AFTER THE SCAN?

You can go home or to work. You can drive a car and eat and drink normally.

## WHAT HAPPENS TO THE RESULTS?

We cannot give you the results of your test. We will send a report to the doctor who asked for the scan as soon as possible.

## CONSENT

Although you consent for this treatment, you may at any time after that withdraw such consent. Please discuss this with your medical team.

## SOURCES OF INFORMATION

British Nuclear Medicine Society (BNMS)

## IMPORTANT INFORMATION

The information in this leaflet is for guidance purposes only and is not provided to replace professional clinical advice from a qualified practitioner.

## YOUR COMMENTS

We are always interested to hear your views about our leaflets. If you have any comments, please contact the Patient Experience Team – Tel: 0300 131 4731 or email: [esh-tr.patientexperience@nhs.net](mailto:esh-tr.patientexperience@nhs.net)

## HAND HYGIENE

The Trust is committed to maintaining a clean, safe environment. Hand hygiene is very important in controlling infection. Alcohol gel is widely available for staff use and at the entrance of each clinical area for visitors to clean their hands before and after entering.

## OTHER FORMATS

**If you require any of the Trust leaflets in alternative formats, such as large print or alternative languages, please contact the Equality and Human Rights Department.**

**Tel: 0300 131 4434 Email: [esh-tr.AccessibleInformation@nhs.net](mailto:esh-tr.AccessibleInformation@nhs.net)**

After reading this information are there any questions you would like to ask? Please list below and ask a member of our team.
