Website: [www.esht.nhs.uk](http://www.esht.nhs.uk)**FREEDOM OF INFORMATION ACT**

I am responding to your request for information under the Freedom of Information Act. The answers to your specific questions are as follows:

- 1) Please tell me in the reporting period 2021/22 the number of deaths that occurred at your Trust for which a case record review or investigation has been carried out which the provider judges as a result of the review or investigation were more likely than not to have been due to problems in the care provided to the patient, with an explanation of the methods used to assess this.**

**NOTE: By 'more likely than not' caused by care, I mean given a score of 3 (probably avoidable), 2 (strong evidence of avoidability) or 1 (definitely avoidable) on the inpatient structured judgement reviews (SJR), as assessed using the Royal College of Physicians avoidability of death criteria. If you do not use this system, please ignore this note.**

I can confirm that we hold the information requested above. However, the information is exempt from disclosure under Section 21 of the Freedom of Information Act 2000. This is because the information is accessible to you, as it is already in the public domain and can be found on page 39 of the Quality Account, via the following link:

<https://www.esht.nhs.uk/about-the-trust/publications-statements-and-initiatives/>

This is an absolute exemption and there is, therefore, no requirement to consider the public interest.

- 2) Please provide me with a brief overview of the FIRST FIVE incidents in 2021/22 identified in question 3 (i.e. cases of deaths that were more likely than not caused by problems in care), withholding any identifying information that would run into a Section 40 exemption.**

Section 21 applied, please see above.

- 3) Finally, can you please summarise what the Trust learnt and what actions have been taken as a result of the aforementioned cases/investigations.**

Section 21 applied, please see above.
