Q3: In the past 3 months, how many patients have received any immunoglobulin treatment for the following diseases:

Primary immunodeficiency (PID)

Secondary immunodeficiency (SID)

Chronic Inflammatory Demyelinating Polyneuropathy (CIDP)

Clarification was sought as we had been advised by our Coding department that we do not code for primary or secondary Immunodeficiency just immunodeficiency. We can find patients with this diagnosis and the position of the diagnosis, i.e. Primary diagnosis in admitting episode or in another position. The former could be counted as primary and the latter as secondary. We asked if you would be happy with this response and confirmation was received as follows:

Please proceed with the available data you outlined.

Primary immunodeficiency (PID)	13
Secondary immunodeficiency (SID)	9
Chronic Inflammatory Demyelinating Polyneuropathy (CIDP)	6

If I can be of any further assistance, please do not hesitate to contact me.
