

Darco All Round Shoe

Why have you been given this device?

You have a current foot problem. You have been given a device especially suited to your needs. All the evidence shows that keeping the pressure off your foot will increase your chances of healing quickly. This device will enable this. This leaflet will tell you how to put your device on and off and how to look after it. If you have any further questions, please speak to one of your podiatry team.

Whilst your device helps to offload the pressure, it is still important that you reduce your activity to ensure you are on your feet as little as possible. It is advisable to wear dressings or socks with the device. We recommend that you do not drive a vehicle while you are wearing this aid. Use extreme caution when walking up and down stairs, on and off curbs, on uneven ground and in slippery or wet conditions. Walk more slowly and cautiously than usual.

This aid is intended for single-patient use only.

Please keep hold of your device once your foot problem has resolved in case you need it for future treatment.

What is the device?

The AllRound Shoe provides stability, protects the foot and reduces pressure on it and can be used in post-operative care and wound care.

How to apply

1. Open the shoe using the Velcro hook and loop straps.
2. Ensure the foot is securely positioned in the shoe with the heel right at the back of the shoe.

3. Close the shoe tightly using the Velcro hook and loop straps to make sure there is no movement of the foot in the shoe.

How to remove

Open the Velcro straps and remove foot with care.

When it should be worn

Can be worn indoors and outdoors. Please wear at all times when walking and standing to help protect the foot.

Keeping it clean

If required the shoe can be washed using a damp cloth or clean with a soft brush, Do not dry the shoe in a dryer or on a radiator. Leave to dry at room temperature.

Important information

This patient information is for guidance purposes only and is not provided to replace professional clinical advice from a qualified practitioner.

Your comments

We are always interested to hear your views about our leaflets. If you have any comments, please contact the Patient Experience Team – Tel: 0300 131 4784 or by email at: esh-tr.patientexperience@nhs.net

Hand hygiene

The trust is committed to maintaining a clean, safe environment. Hand hygiene is very important in controlling infection. Alcohol gel is widely available at the patient bedside for staff use and at the entrance of each clinical area for visitors to clean their hands before and after entering.

Other formats

If you require any of the Trust leaflets in alternative formats, such as large print or alternative languages, please contact the Equality and Human Rights Department.
